If you have bleeding that is not normal for you, see a doctor right away.

Gynecologic Cancer Symptoms Diary

Gynecologic Cancer Symptoms Diary

Gynecologic cancers are cancers that start in a woman's reproductive organs and include cervical, ovarian, uterine, vaginal, and vulvar cancers.

Each has different signs, symptoms, and risk factors. And signs and symptoms are not the same for everybody.

What can you do?

Pay attention to your body and know what is normal for you.

If you have any of the symptoms listed on the other side of this card for two weeks or longer, or if you have bleeding that is not normal for you, see a doctor.

When gynecologic cancers are found early, treatment is most effective.

For more information about gynecologic cancer, please visit www.cdc.gov/cancer/knowledge.
